Industrial Rubber, Inc. Slip-On Rotating Centralizers

Industrial Rubber's Rotating Centralizer has been designed for meeting the requirements for centralizers that are utilized with a rotating liner in highly deviated conditions.

These special centralizers are used in conditions that require high restoring for optimum standoff, also allowing free rotation of the pipe for maximum displacement efficiency.

The Rotating Centralizer is designed for a slow movement of force to minimize the drag in the hole. As with all IRI's Centralizers, the Rotating Centralizer meets or exceeds all API specifications 10D Requirements.

Rotating Centralizer-(Slip On)	
Size	Part Number
2 3/8"	253-0023
2 7/8"	253-0027
3 1/2"	253-0034
4 1/2"	253-0044
5 1/2"	253-0054
6 5/8"	253-0065
7"	253-0070
7 5/8"	253-0075
8 5/8"	253-0085
9 5/8"	253-0095
10 3/4"	253-0106
11 3/4"	253-0116
12 3/4"	253-0126
13 3/8"	253-0133
16"	253-0160
18 5/8"	253-0185
20"	253-0200
