Industrial Rubber, Inc. Turbolizer Centralizer

Industrial Rubber's Turbolizer is a Centralizer that has all the characteristics of the Regular Hinge-Type. **The Main difference** is that the Turbolizer has deflector blades that allows for the deflection of the fluid in the hole causing an outward turbulent motion.

This motion causes the defection of mud and cement toward open sections of the well bore. Also it allows for the channeling of cement and drilling fluids.

The Industrial Rubber's Turbolizer has a self-cleaning action which allows the Turbolizer to continue down the hole without it become obstructed in the hole

Turbolizer- Hinge Type Centralizer	
Size	Part Number
2 3/8"	251-0023
2 7/8"	251-0027
3 1/2"	251-0034
4 1/2"	251-0044
5 1/2"	251-0054
6 5/8"	251-0065
7"	251-0070
7 5/8"	251-0075
8 5/8"	251-0085
9 5/8"	251-0095
10 3/4"	251-0106
11 3/4"	251-0116
12 3/4"	251-0126
13 3/8"	251-0133
16"	251-0160
18 5/8"	251-0185
20"	251-0200
